

## Fire Safety Sanipull Cleanable Replacement Anti Ligature

Sanipull cleanable, replacement pull cords are the product of choice for NHS hospitals, schools and local authority washrooms and toilets. Wherever lighting, nurse call, or disabled assistance alarms require traditional string pulls, Sanipull offers a cost-effective, hygienic alternative

### Why Choose Sanipull?

Traditional string pull cords harbour bacteria deep within their woven fibres, making them hard to sanitize. Installed in washrooms, they often become contaminated with faecal matter and urine due to poor hand hygiene, creating a serious hygiene risk.

Sanipull eliminates this problem:

- Manufactured from tough, durable vinyl
- Easily sanitized by spraying and wiping
- Prevents bacterial build-up
- Installs in under 40 seconds with a clamshell design, fitting either traditional string pulls or ceiling fittings

### Sanipull Specification

Sanipull is intended for use in environments where there is a risk of entanglement or strangulation. The ribbon features 8mm perforations spaced every 15 cm along its length, designed to break apart at designated weak points when subjected to a force of 13 kg  $\pm$  1 kg.

**Please note:** For nurse call pulls to comply with legislation you must have 1 bangle 100mm from the floor and another bangle 800mm - 1000mm from the floor.

### Bulk Purchase Options

For large facilities, ribbons are available in 300-metre reels, allowing you to cut to the required length. Add your choice of bangles and clamshells to complete the setup.

Please contact us if you require further information on bulk purchasing of Sanipull products.
