

Engineer's keypad

The KEY-ENG is a portable, lightweight i-on security keypad that makes the installation and configuration of systems much simpler. When installing a system you need everything to hand, particularly when in awkward areas of a building. Due to this, the KEY-ENG is supplied with a protective case and belt clip providing quick and easy access.

At a glance...

- Portable, lightweight i-on keypad to assist in your installations
- Easy to carry in a protective case with belt clip for quick access
- Move engineering session around installation
- Plugs on to i-on panels and expanders
- Cuts installation time
- No need to locate the nearest keypad to make configuration changes or to carry out localised testing
