

IDENTILEAK

WATER LEAK
DETECTION

VIMPEX

Escape of water and damage due to leakages is an ever-growing risk to business continuity and is an increasing occurrence in residential properties. UK insurance companies are paying out over £987 million in water damages a year...

Identi-Leak, using similar system infrastructure to fire alarm systems continuously monitors for Escape of Water, giving building and facilities managers early indication of potentially devastating water leak events. Thanks to battery back up, Identi-Leak systems work 24 hours a day, protecting buildings from damage, even during power outage.

Two forms of detection available:

Detection Probes

Effective point detection for solid floors, plant and pump rooms and air conditioning drip trays.

Detection Cable

Supplied in 5 and 10 m lengths, which can be connected together to form larger detection zones. Typically fixed under false floors, ceiling voids and other enclosed spaces.

Immediately notifies for escape of water and other leaks.

Applications

- ◆ Data Centres
- ◆ IT Suites
- ◆ Hospitals
- ◆ Remote Telecommunication Sites
- ◆ Residential Properties
- ◆ Libraries and Archives
- ◆ Underground Networks
- ◆ Historical Buildings
- ◆ Pubs and Restaurants
- ◆ Lift Shafts and Escalator Voids

Identi-Leak is also easy to integrate with other applications such as:

- ◆ Building Management Systems (BMS)
- ◆ Solenoid – Instant shut off of water in the event of a leak
- ◆ Mobile Communicator for mobile notification of leaks and faults

IDENTILEAK

Identi-Leak is specifically designed for immediate notification of water leaks helping to protect the building and the assets within.

Identi-Leak Mini Panel

The small, compact panel is designed for simple installations and areas where wall space is at a premium.

FEATURES

- Compact, aesthetic design
- Ideal for both residential and commercial applications
- 30 m of cable per zone
- 10 probes per zone

2, 4 & 8 Zone Identi-Leak Panel

Built using fire alarm technology, this panel can be used for large installations requiring multiple detection zones.

FEATURES

- Suitable for larger installations
- 'Fault' and 'Alarm' relays
- 50 m of cable per zone
- 20 probes per zone

Identi-Leak Water Leak Interface

Interface used for connecting either probes or detection cables. The interface has a remote indicator output and bright blue LED on activation meaning that the location of the leak can be quickly identified.

FEATURES

- Combined probe & cable interface
- Cable & probes can be installed on the same zone
- Can be flush or surface mounted
- Bright blue LED on activation

Identi-Leak Cable (5 & 10 m)

- 5 or 10 m Lengths
- Up to 50 m per zone
- Fixing clips available
- Ideal for large area leak monitoring

Sounder/Beacon

- Low profile
- Blue beacon - clearly identifiable
- Available with or without Beacon
- Easily identifiable with clear "Water Leak" branding

Identi-Leak Probe (1 & 3 m)

- Effective point detection on solid floors
- Up to 20 on a zone
- Pin-point detection
- Protective cages available to avoid damage

Remote Indicator

- Works with Cable & Probe Interfaces
- Bright blue LED
- Flush or surface mounted
- Easy indication of leak location

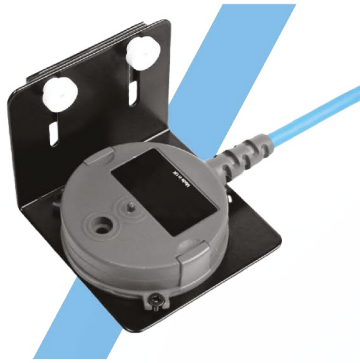

Identi-Leak Voice Sounder

- Available in multiple languages
- Available with or without blue beacon
- Clear spoken message on alarm activation
- Differentiates leak alarm from other building alarms
- Flush or surface mount options

Height Adjuster

- Mounts to the floor
- Up to 12 mm height variation
- Helps to prevent unnecessary alarms
- Easy to adjust height once installed

Drip Tray Mounting Kit

- Compatible with both HS & ID probes
- Mounts on most drip trays
- Variable height adjustment
- Easy to install

Mobile Communicator

- Instant notification of alarm or fault delivered to mobile phones
- Multiple users on one account
- Supplied with 2 year subscription
- Easy connections to panel

Batteries

2 x 12V 7Ah for Large Panels
2 x 12V 1.2Ah for Mini Panel

Fixing Clips

Used for fixing detection cable, probes or interface wiring to the floor.

IDENTILEAK

Water Leak Detection Starter Kit

Our Starter Kits come with Panel, Interface, either a Probe or Cable and a Sounder. Providing everything you need for a simple water leak detection system.
